

Privacy Policy

HitMaker AI · Operated by Najdan Milojković

App Bundle ID: hitmakeralsongcreator.app

Last updated: June 13, 2026

This Privacy Policy explains how Najdan Milojković ("we", "us", "our"), the operator of the mobile application HitMaker AI (the "App"), collects, uses, stores, and shares information when you use the App. By using HitMaker AI you agree to this Policy.

1. Who this applies to

This Policy applies to all users of the App. The App is intended for users who are at least 18 years old. We do not knowingly collect personal information from children. If you believe a child has provided us personal data, contact us and we will delete it.

2. Information we collect

We aim to collect the minimum data needed to run the App. We collect:

- **Account data.** When you first open the App, an anonymous account identifier is created so your Records balance and songs can be saved. If you choose to sign in (e.g., Sign in with Apple), we receive the identifier and, if you allow it, an email address you provide.
- **Profile data.** Optional username and avatar, your Records (in-app currency) balance, and your subscription/premium status.
- **Content you create.** The ideas and prompts you type, generated lyrics, generated audio tracks, cover art, and song details (genre, language, mood, voice style, duration, favorites).
- **Purchase data.** Records of in-app purchases and subscriptions, processed by Apple and our subscription provider. We never receive or store your full payment card details.
- **Usage & diagnostic data.** Anonymous analytics events (for example, that a song was generated), crash reports, device model, operating-system version, app version, and approximate, non-precise technical identifiers.
- **Advertising data.** If you watch a rewarded video to earn Records, our ads provider may process device advertising identifiers as described in their policy.

3. How we use your information

- To create songs from your input and deliver the results back to you.
- To maintain your Records balance, subscription status, and song library.
- To operate, secure, debug, and improve the App.
- To measure overall usage and prevent abuse of free and unlimited features.
- To process purchases and provide customer support.

4. How content is processed and where data is stored

To generate a song, the text and prompts you provide are sent through our backend to third-party artificial-intelligence services that create the lyrics and music. Generated audio and cover images are stored in cloud object storage, and only links plus song metadata are kept in our database. We share data with the following providers:

- **OpenAI (OpenAI, L.L.C.)** — AI generation, improvement, and translation of lyrics, titles, and song text from the prompts you type.
- **Google — Gemini and Lyria** — AI generation of the music and vocals from your prompts.
- **Google Firebase (Authentication, Cloud Firestore, Analytics, Crashlytics)** — identity, metadata, analytics, and crash reporting.
- **Cloudflare R2** — storage of generated audio files and cover images.
- **RevenueCat** — management of subscriptions and in-app purchases.
- **Google AdMob** — rewarded video advertisements.
- **Apple** — App Store and in-app purchase processing.

These providers act as our processors or independent controllers and have their own privacy policies: OpenAI (openai.com/policies/privacy-policy), Google/Firebase (policies.google.com/privacy), Cloudflare (cloudflare.com/privacypolicy), RevenueCat (revenuecat.com/privacy), and Apple (apple.com/legal/privacy). Data may be processed on servers outside your country, including the United States, with appropriate safeguards.

5. Legal bases

Where applicable law (such as the GDPR) requires it, we rely on the following legal bases: performance of our agreement with you (to provide the App), our legitimate interests (to secure and improve the App), your consent (for optional features such as ads or notifications, and before your prompts are sent to AI providers), and compliance with legal obligations.

6. Data retention

We keep your account and content for as long as your account exists. Diagnostic and analytics data is kept for a limited period needed for those purposes. When you delete your account, we delete or anonymize your personal data within a reasonable period, except where we must retain certain records to comply with the law.

7. Your rights

Depending on where you live, you may have the right to access, correct, delete, export, restrict, or object to the processing of your personal data, and to lodge a complaint with a data-protection authority. To exercise these rights, contact us at magic.apps07@gmail.com.

8. Deleting your account

You can delete your account and associated data directly inside the App from Profile → Settings → Delete Account. You may also request deletion by emailing magic.apps07@gmail.com from the address linked to your account. Deletion removes your profile, Records balance, and stored songs.

9. Security

We use industry-standard measures such as encryption in transit, access controls, and trusted infrastructure providers to protect your data. No method of transmission or storage is completely secure, so we cannot guarantee absolute security.

10. Changes to this Policy

We may update this Policy from time to time. The "Last updated" date shows the latest revision. Material changes will be communicated within the App or by other reasonable means.
